Subject: Freedom Industries chemical spill in WV

Rich,

Send a professional email request similar to what you sent to Dawn and I to Lora Werner with ATSDR R3.

You should be able to find her email address in the Global Network but it is Werner.Lora@epa.gov

Lora is the Senior Regional Rep for ATSDR Region 3

ATSDR3's Karl Markiewicz, Toxicologist and Robert Helverson, Environmental Health Scientist, also were and continue to be involved

with the consequences of the spill.

Lora had to work it from all angles: technical, political, upper level management, etc. She works too hard.

Karl was involved with tox issues, risk assessment calculations, coordinating with Eastman and Dupont toxicologists and chemists.

Robert (Bob) was at the site for about a week and was involved behind the scenes.

All three attended one hour conference calls held daily initially and now down to a couple times a week.

Dawn and I will try to participate if that would be useful.

Jack
